

CAPTURE THE MOST MEMORABLE TIME OF YOUR CHILD'S LIFE.

You will receive the comfort of knowing your child's well-being as well as some incredible photos to share with your family and friends. You'll instantly get your baby's photos and be able to send them on-line. Or, take home a sneak preview video tape so everyone can share in this special time of life.

Your 3D Ultrasound Session will include:

- Ultrasound Session with an experienced sonographer
- Photos of your baby
- CD of photos
- Custom Packaging

Gift Certificates are available for unique and personal gift giving. A 3D Ultrasound Session makes the perfect gift for:

- Baby Showers
- Mother's Day
- Father's Day
- Grandparent's Day

The session is best performed when the mother is between 24-34 weeks. This procedure is not offered as a medical treatment or diagnosis, but for entertainment purposes only.

THE FUTURE OF ULTRASOUND IMAGING IS PICTURE PERFECT.

FIRST GLANCE.

Now you can take a “sneak-peek” at baby with real-time 3-dimensional imaging at **Women’s Health Specialists of Saint Louis**. Unlike conventional ultrasound systems that produce 2-dimensional imagery, this technologically advanced system provides an excellent 3-dimensional view of your baby. The system features a beamformer that processes more data than conventional ultrasound systems, increasing the dynamic range of detailed, high-quality images of that bouncing baby of yours. Once you’ve had your chance to see baby, we’ll print out baby pics right on the spot. We can also put the images on a CD for you to share with family and friends.

Call (314) 292-7080 for more information and to schedule an appointment. At **Women’s Health Specialists of Saint Louis**, a picture really is worth a thousand words.
