

Convenience Fee for Injections and Labs

This agreement pertains to all patients that have an insurance policy and excludes all self pay patients. For those who cannot afford the time and hassle of waiting at a lab draw station (where appointments are not given), as a convenience, we will offer this service along with injections of certain medications at our office. Patients who desire Women's Health Specialists to draw blood, or injections understand that they will be charged a \$15 convenience fee. It is understood that this convenience fee is not for drawing and handling of your blood and that it is separate from the "Covered Service" by your insurance company. Please indicate if you accept or decline this offered service.

_____ I accept and am in agreement with this policy and would like to have my labs drawn at our office.

_____ I decline this service and will have labs drawn at a lab station.
